

Clean Air, Happy Customers

Why Ionization is the Smartest Choice for Casino Air Quality

Smoke odors and guest dissatisfaction are two of the biggest challenges in today's casinos. Traditional 100% outside air systems, ozone, and masking agents are costly, disruptive, and ineffective.

Air+ Ionization

Installed in your HVAC air handlers, our ionizers reduce smoke particles and odor-causing VOCs, creating a fresher experience for guests and staff.

Air Quality that Works

Air+ delivers fresher air on the gaming floor, creating a more inviting atmosphere and a better overall guest experience.

Cleaner Air, Healthier Bottom Line

Better air quality helps guests stay longer, play more, and return to a casino known for a fresh, welcoming environment.

Monthly Lease Option

Pay from your operating budget, not capital, while our team handles installation and all maintenance, including tube replacements with zero staff burden.

No Smoke. No Complaints. No Hassle.

The Air+ Advantage for Casinos

- ◆ Reduces smoke particles and odors on the gaming floor
- ◆ Cleaner, fresher guest experience
- ◆ Guests stay longer and spend more
- ◆ Full-service leasing program with zero staff burden

A Wide Range of Product Options for Any Gaming Application

We offer small, needlepoint ionizers and tube-style models that can be installed either on the supply air ductwork or directly into the air handling unit. So, whether a FCU or PTAC unit for a guest room or an AHU serving the gaming floor, our products can be scaled to any application.

500F / 500E

Max Airflow: 5,000/4,000 CFM
Input Voltage: 120V (501)
 230V (502)
Energy Use: 50 / 35 Watts
Tube Length: 21" / 14"

Description: Duct or air handler mounted tube-style ionizer with (5) F/E-tubes for smoking casino systems up to 5,000/4,000 CFM. Unit can be mounted in an AHU with an Air+ supplied mounting rack.

100C / 100D 100E

Max Airflow: C = 500 CFM
 D = 1,000 CFM
 E = 1,500 CFM
Input Voltage: 120V (101)
 230V (102)
Energy Use: 6 / 7 / 8 Watts
Tube Length: 6" / 10" / 14"

Description: Duct or air handler mounted single tube ionizer with (1) C-, D- or E-tube for smoking casino systems up to 1,500 CFM. Unit can be mounted in an AHU with an Air+ supplied mounting bracket.

Controller

Parameters: TVOC, CO₂, O₃, T, RH,
 PM_{2.5}, PM₁₀ particles
Input Voltage: 120V/230V
Data Log: Continuous
Control: Modulating
Signal: 0-10V DC analog

Description: Control system that continuously measures components of air quality and modulates ionizer output all while providing real-time air quality data. Ideal for variable pollutant load such as a casino. Saves energy and prolongs the life of the ionization tubes.

FM-2400/2470

Max Airflow: 2,400 CFM
Input Voltage: 12V-24V AC/DC (2401)
 120/230V AC (2403)
Energy Use: 1 Watt
UL 2998 Cert: Yes

Description: The FM-2400 is a compact, brush-style needlepoint ionizer that mounts at the fan inlet using integrated magnets. It is designed for guest rooms and other small spaces in casino hotels and installs easily in FCUs, heat pumps or PTAC units.

What Customers Say

"Providing a clean, comfortable environment for our guests is essential. After implementing Air+, guest feedback showed a clear improvement in air quality perception, with noticeably fewer complaints about smoke and lingering odors. The results were both immediate and meaningful."

– Shannon Keel, President, Grand Sierra Resort Casino

"Since implementing Air+, odor complaints have effectively disappeared. Both guests and staff quickly noticed the improvement in overall air quality, with employees especially appreciating the reduction in smoke residue after their shifts. For any casino evaluating air quality solutions, Air+ sets the standard."

– Peter Robb, Director of Operations, Lucky Dog Casino
